ENVIRONMENTAL IMPACT STATEMENT

Solwara 1 Project

VOLUME A: MAIN REPORT TEXT

CR 7008_09_v4
September 2008

Project director	David Gwyther	
Project manager	Michael Wright	
Version:	Details:	Approved:
CR 7008_09_v1	Initial draft to client	July 2008
CR 7008_09_v2	Second draft to client	August 2008
CR 7008_09_v3	Third draft to client	September 2008
CR 7008_09_v4	Final for exhibition	September 2008

CONTENTS

1. INTRODUCTION	1-1
1.1 Background	1-1
1.2 Project History	1-2
1.3 Solwara 1 Project Proponent	1-3
1.4 Purpose of the Development	1-3
1.5 Environmental Settings and Issues	1-3
1.6 This Report	1-4
1.6.1 Approach to EIS	1-4
1.6.2 Statutory Context	1-5
1.6.3 EIS Scope	1-6
1.6.4 Report Structure	1-6
1.7 Areas Defined	1-8
2. VIABILITY OF THE PROJECT	2-1
2.1 Proponent's Credentials	2-1
2.2 Feasibility Investigations	2-1
2.2.1 Geophysics	2-2
2.2.2 Engineering	2-3
2.2.3 Geotechnical Investigations	2-3
2.2.4 Resource Investigation	2-3
2.2.5 Oceanography	2-4
2.2.6 Water and Sediment Quality	2-4
2.2.7 Biology	2-4
2.3 Compatibility with PNG Government Strategies	2-5
3. POLICY, LEGAL AND ADMINISTRATIVE FRAMEWORK	3-1
3.1 PNG Legislation and Agreements	3-1
3.1.1 <i>Mining Act 1992</i>	3-1
3.1.2 <i>Environment Act 2000</i>	3-1
3.2 Other Legislation and Regulations	3-3
3.2.1 Existing	3-3
3.2.2 Proposed	3-4
3.2.3 Guidelines	3-4
3.3 International Environmental Agreements	3-5
3.4 Socioeconomic Impact Assessment Requirements	3-6
3.5 International Standards and Principles	3-7
3.5.1 Australian Guidelines	3-7
3.5.2 Equator Principles	3-7

4. STAKEHOLDER CONSULTATION	4-1
4.1 Overview	4-1
4.2 Independent State of Papua New Guinea Consultation Requirements	4-1
4.3 Stakeholders	4-1
4.4 Public Consultation and Disclosure Program	4-4
4.4.1 Goals	4-4
4.4.2 Consultation Methods	4-4
4.4.3 Consultation Program	4-5
4.5 Documentation of Stakeholder Consultation	4-9
4.6 Consultation Outcomes	4-10
4.7 Continuing Consultation	4-11
5. DESCRIPTION OF THE PROPOSED DEVELOPMENT	5-1
5.1 Project Area Definition	5-1
5.1.1 Solwara 1 and South Su	5-1
5.1.2 Barge Corridor and Crew Transfers	5-1
5.1.3 Port of Rabaul	5-1
5.2 Project Components	5-2
5.2.1 Offshore	5-2
5.2.2 Onshore	5-2
5.3 Rationale for the Location of Project Components	5-3
5.3.1 Mining Method	5-3
5.3.2 Location of Onshore Facilities	5-3
5.4 Mineral Resource	5-4
5.5 Scale of the Project	5-4
5.6 Offshore Mining Equipment	5-5
5.6.1 Seafloor Mining Tool	5-5
5.6.2 Riser and Lift System	5-8
5.6.3 Mining Support Vessel	5-9
5.6.4 Remotely Operated Vehicles	5-10
5.7 Mining	5-10
5.7.1 Mine Plan	5-10
5.7.2 General Mining Sequence	5-13
5.8 Hazardous Materials Management	5-16
5.8.1 Transportation	5-16
5.8.2 Storage, Handling and Disposal	5-17
5.8.3 Fuel and Oil	5-17
5.8.4 Explosives	5-17
5.9 Workforce	5-17
5.9.1 Employment Policy	5-17
5.9.2 Workforce	5-18
5.10 Construction and Operating Standards	5-18
5.10.1 Design Codes	5-18
5.10.2 Health and Safety	5-18

5.11	Commissioning	5-19
5.12	Decommissioning and Closure	5-19
5.12.1	Offshore Infrastructure	5-19
5.12.2	Onshore Facilities	5-19
6.	DEVELOPMENT TIMETABLE	6-1
7.	DESCRIPTION OF THE EXISTING ENVIRONMENT	7-1
7.1	General	7-1
7.1.1	Tectonics and Seismicity	7-1
7.1.2	Volcanism	7-2
7.1.3	Tsunamis	7-2
7.2	Studies Completed	7-3
7.3	Hydrothermal Vents	7-8
7.3.1	Introduction	7-8
7.3.2	Vent Environment and Biology	7-9
7.3.3	Issues and Studies	7-10
7.4	Meteorology and Air Quality	7-11
7.4.1	Climate	7-11
7.4.2	Air Quality	7-12
7.5	Physical Oceanography and Deep Sea Sedimentation	7-12
7.5.1	Regional Current Circulation	7-12
7.5.2	Tides in the Eastern Bismarck Sea	7-13
7.5.3	Oceanography at Solwara 1	7-13
7.5.4	Deep Sea Sedimentation	7-15
7.6	Water Quality	7-16
7.7	Sediment Quality	7-20
7.7.1	Seafloor Geological Setting	7-20
7.7.2	Sediment Mineralogy and Geochemistry	7-21
7.8	Biological Environment	7-23
7.8.1	Surface and Water Column	7-24
7.8.2	Seafloor	7-29
7.8.3	Underwater Light, Noise and Vibrations	7-45
7.9	Description of the Existing Nearshore and Onshore Environment	7-47
7.9.1	General	7-48
7.9.2	Marine Environment	7-48
7.9.3	Terrestrial Flora and Fauna	7-50
7.9.4	Landform, Soils and Geology	7-50
7.9.5	Air Quality and Noise	7-50
7.9.6	Cultural Heritage	7-50
7.9.7	Existing Use	7-50
7.9.8	Port Management	7-52
8.	SOCIOECONOMIC ENVIRONMENT	8-1
8.1	Papua New Guinea in Brief	8-1
8.1.1	Population and Society	8-1
8.1.2	Sovereignty	8-1
8.1.3	Communities, Religion and Language	8-1

8.1.4	Land Ownership	8-2
8.1.5	Economy	8-2
8.1.6	United Nations Millennium Development	8-3
8.1.7	Government	8-4
8.2	Project Impact Area	8-5
8.2.1	Kavieng	8-5
8.2.2	Rabaul	8-6
8.3	Fisheries	8-7
8.3.1	Commercial Fisheries	8-7
8.3.2	Subsistence Fisheries	8-8
8.3.3	Simpson Harbour	8-8
8.4	Transportation	8-9
9.	ENVIRONMENTAL IMPACTS AND MITIGATION MEASURES	9-1
9.1	Definitions and Impact Assessment Criteria	9-1
9.1.1	Extent	9-2
9.1.2	Duration	9-2
9.1.3	Severity	9-2
9.2	Air Quality	9-2
9.3	Oceanography and Deep-sea Sedimentation	9-3
9.4	Offshore Water Quality	9-3
9.4.1	Issues to be Addressed	9-3
9.4.2	Mitigation and Management Measures	9-4
9.4.3	Residual Impacts	9-5
9.5	Sediment Quality	9-10
9.5.1	Issues to be Addressed	9-10
9.5.2	Mitigation and Management Measures	9-11
9.5.3	Residual Impacts	9-12
9.6	Biological Environment	9-14
9.6.1	Surface, Water Column and Nearshore	9-14
9.6.2	Seafloor Habitat and Biodiversity	9-18
9.6.3	Light and Underwater Noise	9-27
9.7	Maritime Safety and Interactions with Shipping	9-30
9.7.1	Issues to be Addressed	9-30
9.7.2	Mitigation and Management Measures	9-30
9.7.3	Residual Impacts	9-31
9.8	Quarantine	9-31
9.8.1	Issues to be Addressed	9-31
9.8.2	Mitigation and Management Measures	9-31
9.8.3	Residual Impacts	9-32
9.9	Waste Management and Emergency Response	9-32
9.9.1	Issues to be Addressed	9-32
9.9.2	Mitigation and Management Measures	9-34
9.9.3	Residual Impacts	9-37
9.10	Port of Rabaul	9-38
9.10.1	Marine Environment	9-38
9.10.2	Landform, Soils and Geology	9-39

	9.10.3 Noise	9-39
	9.10.4 Air Quality	9-40
10.	SOCIOECONOMIC IMPACTS AND MITIGATION AND MANAGEMENT	10-1
10.1	Issues to be Addressed	10-1
10.2	Mitigation and Management Measures	10-3
	10.2.1 Optimisation of Benefits	10-3
	10.2.2 Management and Mitigation	10-3
10.3	Residual Impacts	10-4
	10.3.1 Economic	10-4
	10.3.2 Community Development Fund	10-5
	10.3.3 Industry Diversity and Skills Development	10-5
	10.3.4 In-migration and Community Conflicts	10-6
	10.3.5 Fisheries and Marine Traffic	10-6
11.	ACCIDENTAL EVENTS AND NATURAL HAZARDS	11-1
11.1	General	11-1
11.2	Extreme Weather	11-1
	11.2.1 Issues to be Addressed	11-1
	11.2.2 Mitigation and Management Measures	11-1
	11.2.3 Residual Impacts	11-2
11.3	Seismicity, Volcanism and Tsunamis	11-2
	11.3.1 Issues to be Addressed	11-2
	11.3.2 Mitigation and Management Measures	11-3
	11.3.3 Residual Impacts	11-4
11.4	Hazardous Material Leakage or Spillage	11-6
	11.4.1 Issues to be Addressed	11-6
	11.4.2 Mitigation and Management Measures	11-6
	11.4.3 Residual Impacts	11-7
11.5	Fire and Explosion	11-7
	11.5.1 Issues to be Addressed	11-7
	11.5.2 Mitigation and Management Measures	11-7
	11.5.3 Residual Impacts	11-8
11.6	Collisions	11-8
	11.6.1 Issues to be Addressed	11-8
	11.6.2 Mitigation and Management Measures	11-8
	11.6.3 Residual Impacts	11-9
12.	GREENHOUSE GAS EMISSIONS AND CLIMATE CHANGE	12-1
12.1	Introduction	12-1
12.2	Estimated GHG Emissions	12-1
12.3	GHG Emissions Assessment	12-1
13.	ENVIRONMENTAL MANAGEMENT, MONITORING AND REPORTING	13-1
13.1	Introduction	13-1
13.2	Organisational Structure and Responsibilities	13-1
13.3	Environmental Management System	13-2
13.4	Environmental Management Plan	13-2

13.4.1	Mitigation and Management	13-3
13.4.2	Monitoring	13-4
13.4.3	Reporting	13-5
14.	STUDY TEAM	14-1
14.1	Nautilus	14-1
14.2	Coffey Natural Systems	14-1
14.3	EIS Specialist Subconsultants	14-2
15.	REFERENCES	15-1
16.	GLOSSARY	16-1

Tables

1.1	Solwara 1 Project EIS – Supporting Studies	1-7
3.1	Other environmental legislation and regulations	3-3
3.2	General legislation and regulations	3-3
3.3	Proposed marine pollution bills	3-4
3.4	Applicable international agreements to which PNG is a signatory	3-5
3.5	Applicable IFC guidelines	3-8
4.1	Project stakeholders	4-2
4.2	Public consultation	4-5
4.3	Project response to issues raised during consultation sessions	4-10
5.1	Indicated and inferred mineral resource estimate (4% Cu cut off)	5-4
5.2	Comparison of the Solwara 1 Project with other PNG mines at time of EIS approval	5-5
5.3	SMT instrumentation and sensors	5-6
5.4	Mining support vessel technical details	5-9
5.5	Unconsolidated sediment removal rates	5-11
5.6	Competent waste material side casting rates	5-12
5.7	Offshore operations workforce	5-18
7.1	Geophysical and environmental studies completed at Manus Basin	7-3
7.2	General water quality and filtered metals at Solwara 1 in 2006	7-17
7.2	General water quality and filtered metals at Solwara 1 in 2006 (cont'd)	7-18
7.3	Wave Mercury 07 Campaign filtered metal concentrations at Solwara 1	7-19
7.4	Cetacean species likely to occur at Solwara 1	7-27
7.5	Meiobenthos from sediments at Solwara 1 and South Su (numbers of individuals/10 cm ² in top 1 cm of sediment)	7-42
7.6	Meiobenthos taxa (number of individuals/10 cm ²) in abyssal plain sediments remote from Solwara 1	7-43
7.7	Marine water quality adjacent to the Port of Rabaul	7-48
7.8	Port of Rabaul Ship Movement 1993 to 1997	7-51
7.9	Port of Rabaul Berth Dimensions	7-51
8.1	PNG development indicators at 2000	8-3
8.2	New Ireland performance against millennium goals	8-5
8.3	East New Britain performance against millennium goals	8-6
8.4	PNG domestic and locally based foreign fishing fleet catch composition	8-7
8.5	International fleet catch composition in the PNG EEZ	8-8

9.1	Maximum acid-extractable metal concentrations measured in samples	9-6
9.2	Maximum concentrations of the metals measured in Phase 1 elutriate tests	9-7
9.3	Plume concentrations probability	9-9
9.4	Deposition of unconsolidated sediment and competent waste rock	9-12
9.5	Estimates of ballast water discharge	9-32
12.1	Predicted emissions of greenhouse gases (CO ₂ -equivalent)	12-1
13.1	Summary of proposed seafloor monitoring program	13-6
